## Technical Data Sheet

### RS 7935

TDS

Aliphatic urethane acrylate dispersion

### Summarize

RS 7935 is a waterborne aliphatic urethane acrylate dispersion with good toughness, fast curing speed, high hardness, good adhesion to plastic substrates.

### Characteristic

1. Good stain resistance.
2. Good toughness.
3. Fast curing.
4. Good adhesion on plastic substrates.
5. Easy matting, good dispersion of matte powder.

### Property \*

Property	Value	Unit
Viscosity (25°C)	50-800	Mpa•s
pH (25°C)	3.0-7.0	
Density (25°C)	1.0-1.1	g/ml
Solid	41-45	Wt.%
Appearance	Milky white liquid	

\* This performance represents only typical performance and should not be considered as a product specification.
